AJAYI CHIBUEZE ADEYEMI

WEB & MOBILE DEVELOPER

ABOUT ME

Professional software developer, having great expertise in building software solutions like: APIs, cross-platform or native mobile or web applications, using cutting edge infrastructures like: Azure, AWS, GitHub, Heroku, Apache, Tomcat, GIT, Docker, Kubernetes and so on – adopting all standardized DevOps practices. My level of expertise is of no doubt, as I have and by experience (4 years) worked in agile environments building sophisticated microservice architectures, monolithic architectures, RESTful architectures, SPAs, and lots more.

Assuredly, I possess soft skills which guarantees excellence in service – from communication, association, team orientation to leadership. I am of a proven track record of being a part of several software solutions.

SKILLS

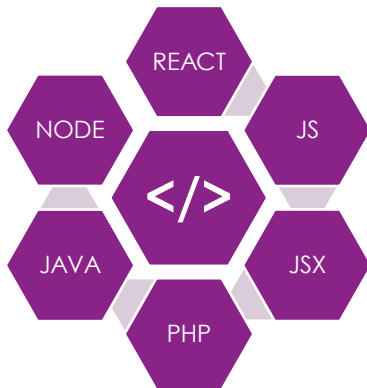

- **FRONTEND DEVELOPEMENT:** HTML, CSS, Bootstrap, TailwindCSS, JavaScript and React
- **BACKEND DEVELOPMENT:** Php(Laravel), JavaScript(Node.JS), Python, Java(Spring)
- **MOBILE DEVELOPMENT:** Java(Native Android), React Native, Dart(Flutter)

EXPERIENCE

T21services – Web Developer (2022 till date)

- Delivered high quality codes that passed quality assurance test, user acceptance test, etc.
- Documented engineering designs for inhouse and client projects.
- Delivered mobile applications built on server or serverless architecture.
- Built and extended engineering architectural patterns.

- Built professional web interfaces, with high quality backend infrastructures either on microservice or monolithic architectures.
- Built and extended APIs on industrial RESTful architectural standards.
- Managed and analyzed company's database.
- Supported migration to, and sustainment of, cloud-based platforms
- Worked with science and development teams to develop and troubleshoot website interfaces

Credimeter – Mobile Developer (intern) – 3 months

- Translated feature pitch into technical specifications.
- Developed mobile apps in unison with co-interns and designers.
- Reviewing teammate's pull requests with a mindset of learning more and increase code quality.
- Iterated on the tools used for automated app build and release.
- Collected, analyzed, reviewed, documented, and communicated mobile business needs and requirements.
- Collaborated with UX Professionals, Product Development Engineers, Product Managers and Marketers, Quality Assurance groups, 3rd-party vendors, Senior Leadership, to get necessary task done timely
- Analyzed and provided remedies for software errors and malfunctions in a timely and accurate fashion, providing status reports where required.
- Contributed to the maintenance of existing internal and external app releases, including debugging code defects and adapting to the latest infrastructure
